**Slimline Design**  
**Easy Installation**  
**Protects power and data**

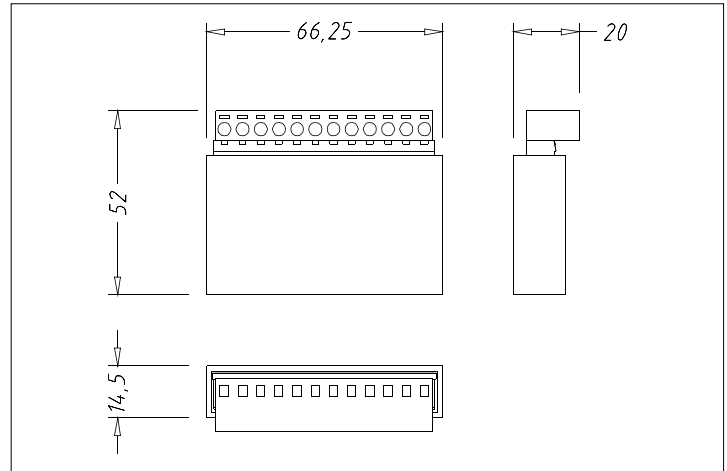

The signal line protector is a versatile protection unit that may be used to protect electric gate motor controllers and intercom systems. It consists of 10 protection circuits referenced to the common power supply point with a gas arrester connection to mains earth where available.

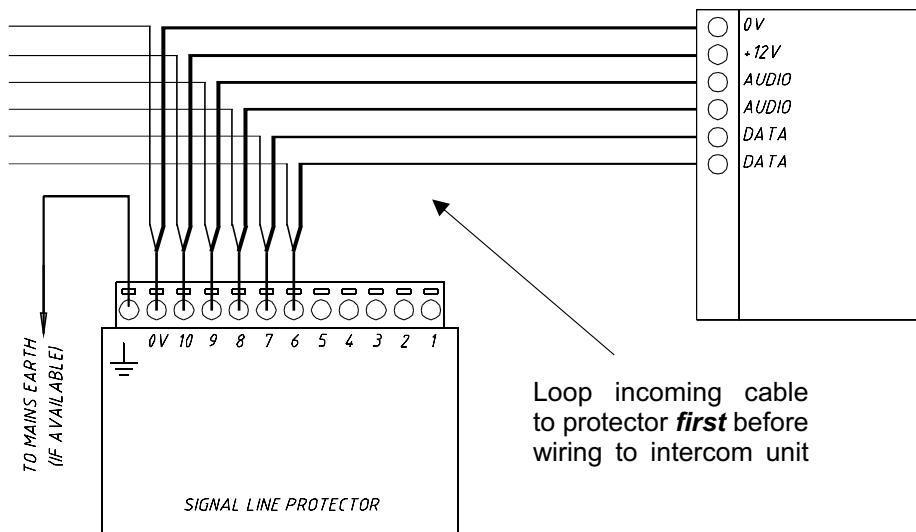

### Caution:

Make sure that the protector voltage exceeds the power supply voltage of the equipment.

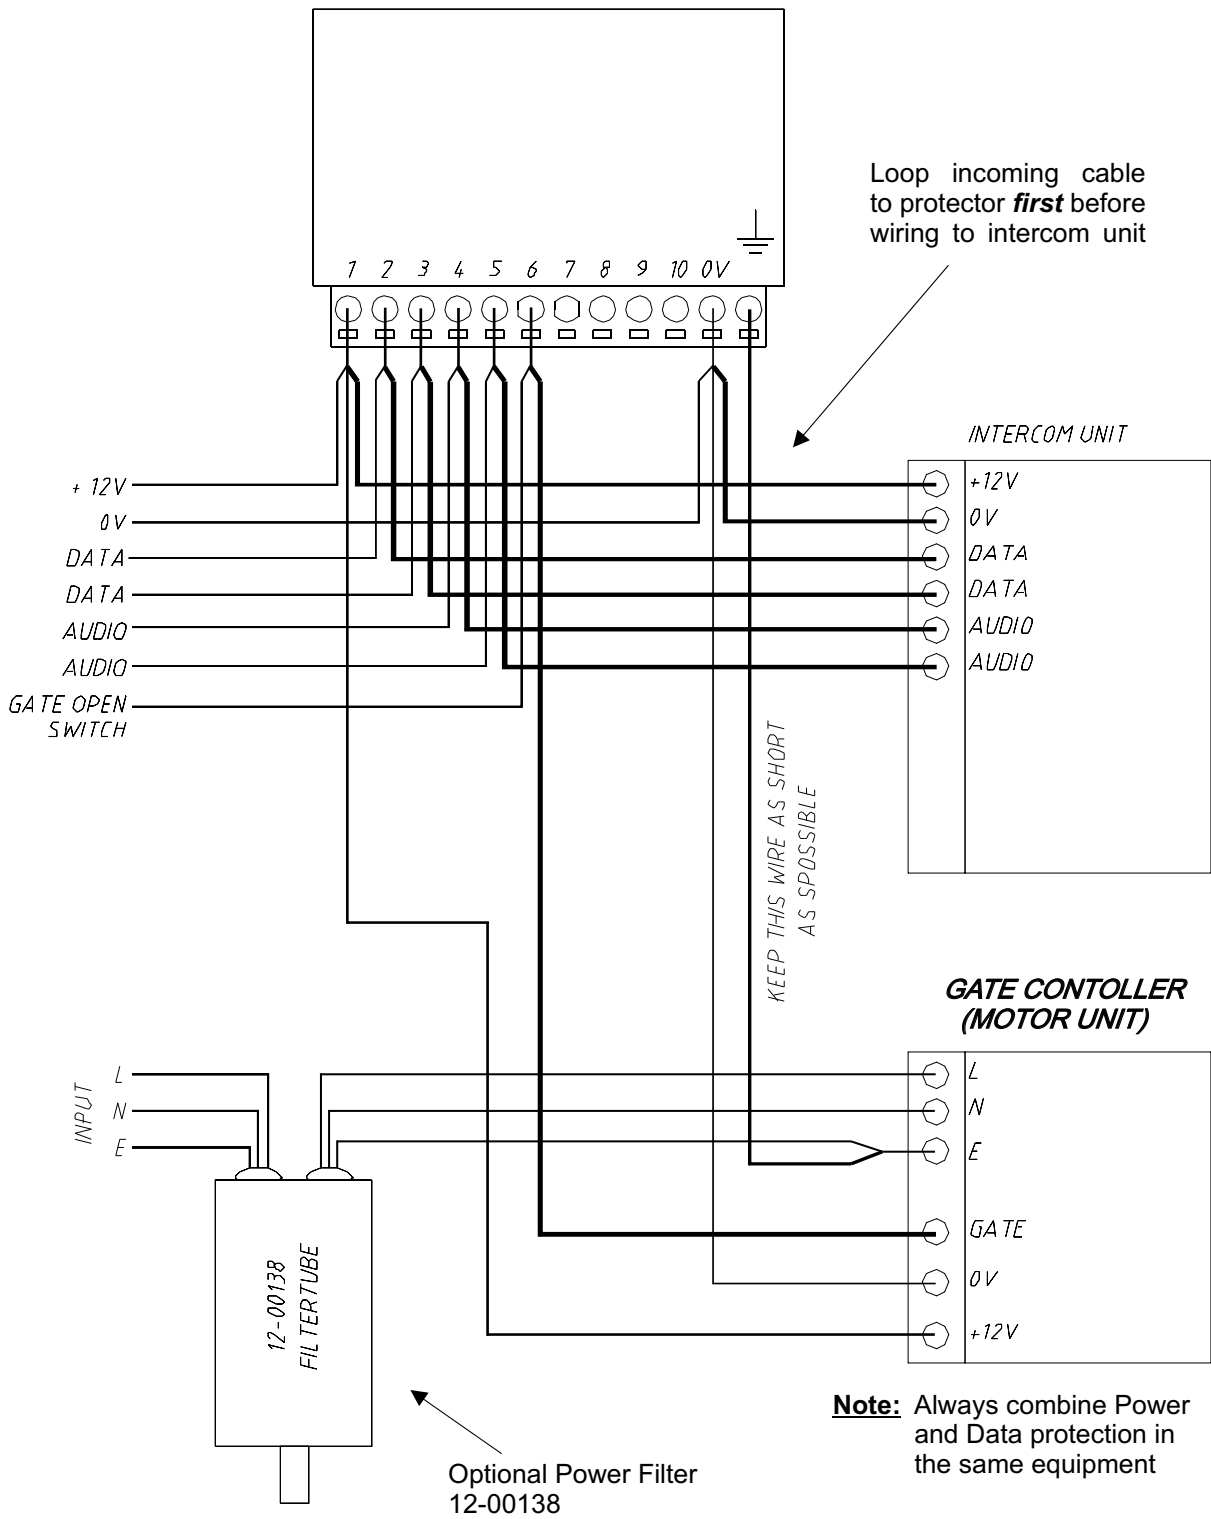

### Dimensions

### Application for Intercom System

**Application for Gate / Intercom System**

**Note:** Always combine Power and Data protection in the same equipment

**Warranty**

All Clearline protection products carry a warranty for a period of two years from the date of purchase, provided that they are installed in accordance with the manufacturer's recommendations. Defective devices should be returned prepaid to Clearline Head Office or to the registered agent in the various areas. The Manufacturer's liability is limited to the repair or replacement of the product (at the manufacturer's discretion) which in its judgement has not been misused or operated under conditions exceeding the manufacturer's specifications. The warranty is void if the devices in question have been opened or serviced by anyone other than authorised Clearline personnel. Clearline will not be held responsible for consequential or implied damages.
